raise a mound

of stone, 2 ft. base, 1½ ft. high, S. of cor.

From this cor. the ¼ sec. cor. of sec. 32 bears N. 89° 59' W., 4.82 chs. dist.

Land, rolling mountainous land.

Soil, rocky, decomposed granite and limestone; 3d rate.

Timber, aspen and juniper; undergrowth, sagebrush and snowbrush.

Grazing, good.

Final Test of Solar Attachment.

July 25, 1939: The solar attachment of the transit with which this survey was executed was tested upon the meridian described in the field notes of the completing survey of T. 28 N., R. 55 E., and found to be in satisfactory adjustment.

General Description

Township 27 North, Range 54 East, is situated about 15 miles in a southwesterly direction from Jiggs, Nevada, in low rolling hills that become mountainous in the southern and western portions of the township. In general the drainage is easterly.

The soil consists of a sandy, rocky clay; 3d rate.

A sparse growth of aspen and juniper timber together with a semi-dense undergrowth of sagebrush, rabbitbrush and native grasses covers the township.

Shallow streams of cattle water and alkali springs are found in many of the draws and drains.
