Final Test of Solar Attachments.

November 16, 1936, upon the suspension of the survey of this township, the instruments used were tested upon the meridian described in the Subdivision of T. 26 N., R. 55 E., surveyed under this group and accepted, and found to be in satisfactory adjustment.

June 1, 1939, survey completed and the solar attachment of the instrument used was tested upon the meridian described on page 1, of these notes and found to be in satisfactory adjustment.

General Description

Township 27 north, range 55 east is situated in a northeasterly direction about 50 miles from Eureka, Nevada. It is entered by an improved road connecting Eureka and Elko. The land within the portion of the township to which these notes refer, is rolling, with the general drainage toward Huntington Creek.

The soil is a rocky, sandy, alkaline clay; 3d rate.

There is no commercial timber; only a widely scattering growth of juniper and cedar, with an undergrowth of sagebrush, rabbitbrush, buttonbrush and native grasses, which afford fair to good grazing.

There are no settlers in the portion of the township included in this survey.
