

SUBDIVISION OF T. 4 N., R. 65 E.

Chains	broken land.
27.90	Wash, 40 lks. wide, course W.; over nearly level broken land.
29.50	Wash, 10 lks. wide, course N. 80° W.; asc. 10 ft. abruptly.
33.10	Wash, 5 lks. wide, course N. 60° W.; asc. 40 ft. along a W. slope.
34.45	Set an iron post, 3 ft. long, 1 ins. diam., 27 ins. in the ground, for the $\frac{1}{4}$ sec. cor., with brass cap mkd. $\frac{1}{4}$ S6 S5 1938. from which A juniper, 4 ins. diam., bears S. 82° E., 50 lks. dist., mkd. $\frac{1}{4}$ S5 BT. A juniper, 4 ins. diam., bears N. 45 $\frac{1}{4}$ ° W., 127 lks. dist., mkd. $\frac{1}{4}$ S6 BT.
61.70	Draw, drains N. 50° W.; asc. 60 ft. over a N. slope.
71.00	Spur, slopes S. 80° W.; desc. 20 ft. over a S. slope.
74.45	The cor. of secs. 5, 6, 7 and 8. Land, rolling and broken. Soil, decomposed granite and drifted sand, 3rd rate. Timber, juniper; undergrowth, sagebrush, and briar.

Final Test of Solar Attachments.

Upon the discontinuence of the survey of this Tp., Nov. 21, 1937, solar transits Buff & Buff No. 18001 and Young and Sons' No. 8515, were tested upon the meridian described at the beginning of the survey, and found to be in satisfactory adjustment.

Upon the completion of the survey of this Tp., May 22, 1938, solar transits Young & Sons' No. 8394 and W. & L.E. Gurley No. 262669 were tested upon the meridian described at the beginning of the survey, and found to be in satisfactory adjustment.

General Description

Township 4 North, Range 65 E. is situated NW. a distance of about 15 miles from Pioche, Nevada. It is entered by a dirt road leaving paved Highway No. 93, 13 miles north of Pioche.

The land is rolling, increasing to mountainous within sections 3, 4, 8, 9, 15 and 16. The drainage is divided east from west, by a short ridge extending from the north line of section 33 and leaving the township thru the north boundary of section 4. This ridge reaches its highest elevation at Fairview Peak in sec. 15.

The soil consists of a mixture of drifted sand and decomposed limestone and granite; it is decidedly shallow and covered with an alkaline dust.

Found within the township is a scattering growth of
