

South, East, and North Boundaries of T. 8 S., R. 63 E.

Chains

The Second Standard Parallel South along the south boundary of T. 8 S., R. 63 E. was surveyed by A. R. Talamantes, U. S. Surveyor, under Group 1, Nevada, in 1911.

The west boundary of the township was surveyed concurrently, the record of which appears in the field notes entitled "Dependent Resurvey of the East Boundary of T. 8 S., R. 61 E.; Independent Resurvey of a Portion of the South Boundary and Survey of the East and North Boundaries of T. 8 S., R. 62 E."

The following field notes are those of an independent resurvey of the south boundary and survey of the east and north boundaries of T. 8 S., R. 63 E.

The survey was executed with Buff and Buff transits Nos. 26591, 17992 and 17994. For a description of these transits and other equipment used, tests of instruments, determination of meridian, and methods of procedure, see field notes entitled "Dependent Resurvey of the East ½ Mile of the South Boundary; Independent Resurvey of the West 5½ Miles of the South Boundary; and Survey of the West Boundary of T. 8 S., R. 66 E." executed concurrently under this same group.

The geographic position of the SE. cor. of T. 8 S., R. 63 E., determined by double chained traverse line to geographic positions shown in the Special Instructions, is latitude 37° 12' 09.7" N., and longitude 114° 51' 57.3" W.

All lines of this survey are double chained and the distances shown in these field notes are the average of the two measurements. In no instance was the difference between the two measurements greater than 8 links for any one half mile.

All corners on the Second Standard Parallel South along the south boundary of T. 8 S., R. 63 E. are set on a rhumb line between beginning and terminal corners; the beginning corner being the reestablished original standard ¼ sec. cor. of sec. 36, T. 8 S., R. 66 E., and the terminal corner being the original standard cor. for SE. cor. of sec. 36, T. 8 S., R. 62 E. The north boundary of T. 8 S., R. 63 E. is also established on a rhumb line between the NE. and NW. corners of the township.

Independent Resurvey of the Second Standard Parallel South,
Along the South Boundary of T. 8 S., R. 63 E.

Superseding the Original Survey Executed by
A. R. Talamantes, U. S. Surveyor, under Group 1, Nevada, in 1911.

Beginning at the independently reestablished standard cor. of Ts. 8 S., Rs. 63 and 64 E., described in the field notes of the independent resurvey of the Second Standard Parallel South, along the S. bdy. of T. 8 S., R. 64 E.

N. 89° 59' W., along the S. bdy. of sec. 36, T. 8 S., R. 63 E., along a rhumb line.

Over nearly level desert, through scattered timber and undergrowth.

5.10 Unimproved dirt road, bears N. 60° W. and S. 60° E.

9.50 Wash, 5 lks. wide, 2 ft. deep, drains S.
