

Subdivision of the SE $\frac{1}{4}$ of Sec. 4, T. 21 S., R. 60 E.

Chains	
1.60	Wash, 40 lks. wide, course S. 80° E.
10.50	Wash, 40 lks. wide, course N. 80° E.
21.03	Point for the SE 1/16 cor. of sec. 4, at intersection with the E-W center line of the SE $\frac{1}{4}$ of sec. 4. Set an iron post, 30 ins. long, 2 $\frac{1}{2}$ ins. diam., 12 ins. in the ground to bedrock, with brass cap mkd. SE 1/16 S 4 1952 Dig a circular trench, 5 ft. diam., and raise a mound of stone around the post to top.
24.85	Wash, 35 lks. wide, course NE.
32.00	Wash, 20 lks. wide, course E.
42.06	The C-E 1/16 cor. of sec. 4.
	From the S 1/16 sec. cor. of secs. 3 and 4. N. 88°48' W., on the E-W center line of the SE $\frac{1}{4}$ of sec. 4. Over gently rolling desert land.
20.15	The SE 1/16 cor. of sec. 4.
40.30	The C-S 1/16 cor. of sec. 4.
	General Description Secs. 1, 2, 3, 4, 11 and 12, in T. 21 S., R. 60 E., covered by this resurvey and containing areas classified for small tracts, are situated in Clark County Nevada, a short distance west and southwest of the City of Las Vegas. The area lies south of Charleston Road which runs irregularly along the 5th Standard Parallel South, of the Mount Diablo Meridian. The terrain consists of nearly level and gently rolling desert, with a soil covering of sand and gravel deposits, generally underlain with a solid layer of limestone called "caliche". The general elevation is about 2300 ft. above sea level. A large gravel pit excavation is located in sec. 2, parts of which have been extended into sec. 1. Some of the small tracts lie in this gravel pit. Water is found in several recently drilled wells in sec. 36, T.20S.,R.60E. They indicate the possibility of finding water in T.21S., R.60E. No wells have been drilled in the latter township. There are no permanent inhabitants, nor any farms or cultivated areas in the township.. No indications of minerals were found, other than the deposits of gravel, which have a commercial value in construction work. The area drains easterly and is traversed by numerous small washes. There is no natural timber and the undergrowth consists of the usual desert vegetation of desert sage, greasewood and catclaw. The area is easily accessible by Charleston Road, an old dirt road which existed in the early days, running from Las Vegas to Ivanpah, a dirt road running along the Bell System telephone line in sec. 12, and other dirt roads
