1958

From this cor. the standard cor. of Tps. 24 S., Rs. 61 and 62 E., which is mkd. with an iron post, 3 ins. diam., firmly set in the ground, with brass cap mkd. and witnessed as described in the official record, bears W. 5.09 chs. dist.

## General Description

The greater portion of T. 25 S., R. 62 E. is located in the El Dorado Valley and is nearly level land with the exception that the northwest tier of the township is gently rolling to rough mountainous land. The general elevation of the township ranges from about 1800 ft. in the northeast portion to about 2500 ft. in the southern portion and to about 3000 ft. above sea level along the western tier of sections in the township.

The soil is a sandy and gravelly clay loam and is covered with stones for approximately one-half of the township. There is no timber or springs or streams in the township.

A power line constructed by the City of Los Angeles, Division of Power, Light and Water, which is comprised of three individual lines, constructed on steel towers, enters the township near the  $\frac{1}{4}$  section corner of section 1 on the north boundary of the township and traverses in a general southwest direction through sections 1, 2, 3, 10, 9, 16, 17, 18 and 19, and leaves the township near the  $\frac{1}{4}$  section corner of section 19 on the west boundary of the township. There are two telephone lines located in the township. One telephone line enters the township about midpoint between the closing corner of sections 2 and 3 and the  $\frac{1}{4}$  section corner of section 2 on the north boundary of the township, traverses in a general southwest direction through sections 2, 3 and 10, thence west-southwest through sections 15, 16, 17, 20 and
