

Dependent Resurvey of the E. Bdy., T. 26 S., R. 61 E.

Chains

Continue over nearly level land, through scattered undergrowth; desc. 17 ft. over gradual NE. slope.

9.90 Wash, 50 lks. wide, 4 ft. deep, drains NNE.; cont. descent; desc. 47 ft. over a gradual NNE. slope.

33.80 Wash, 40 lks. wide, 3 ft. deep, drains NE.

41.21 The cor. of Tps. 25 and 26 S., R. 61 E., monumented with a $2\frac{1}{2}$ ins. iron post, set, mkd. and witnessed as described in the field notes of T. 25 S., R. 62 E., surveyed concurrently under this same group.

From this point the closing cor. of Tps. 25 and 26 S., R. 62 E., monumented with an iron post, $2\frac{1}{2}$ ins. diam., set, mkd. and witnessed as described in the field notes of T. 25 S., R. 62 E., surveyed concurrently under this same group. Bears N. 1 12' W., 6.31 chs. distant.

Independent Resurvey of the Subdivisional Lines, T. 26 S., R. 62 E.

The dependent resurvey of the north boundary of T. 27 S., R. 62 E., disclosed the boundary was defective in alignment and could not be rectified. Corners of minimum control, for the quarter-section and section corners, were reestablished for the south boundary of T. 26 S., R. 62 E., at regular intervals of 40.00 chains in westing, alternately from the established southeast corner of T. 26 S., R. 62 E.

In the independent resurvey of the subdivisional lines, a sectional correction line was established as a permanent line on a true latitudinal curve, initiated at the first regular section corner on the east boundary and projected to an intersection with the west boundary of the township, where a closing corner was established. The intermediate quarter-section and section corners were marked as temporary points at regular intervals of 40.00 chains, alternately, counting from the east. The section corners on the sectional correction line are established at the several points of intersection on the meridional section lines aligned in the usual manner. Thereafter, the quarter-section corners on the sectional correction line were established at midpoint positions, except in the west range of sections. The quarter-section and 1/16th section corners on the meridional section lines in the south tier of sections were permanently established at
