| 39.85 | <p>The cor. of Tps. 28 and 29 N., Rs. 43 and 44 E., described in the field notes of the resurvey of T. 29 N., R. 43 E. in 1959.</p> <p>Land, nearly level. Soil, loam. Vegetation, sagebrush, shadscale and greasewood.</p> <div>General Description</div> <p>The land around the above described boundaries is level to nearly level except for the southeast and southwest portions which are fairly large hills, with low rolling hills along the west boundary. The drainage is in a north to northeasterly direction. The main channel is the Reese River which enters the township 7.50 chains east of the southwest corner of section 35 on the south boundary, and leaves 8.80 chains east of the northwest corner of section on the north boundary. The elevation varies from 4,800 feet in the valley to 6,500 feet above sea level at the high peak at the southwest corner of the township.</p> <p>The soil is loam in the valley and gravel and rocks in the hills, with undergrowth of sagebrush and shadscale.</p> <p>The Nevada State Highway enters near the southeast corner of section 35 on the south boundary, and leaves near the east $\frac{1}{4}$ corner of section 13 on the east boundary of the township. A gravel road enters near the southeast corner of section 34, meanders north-easterly along the foot of the hills, leaving near the northwest corner of the township. A main road to the McCory mine enters near the north $\frac{1}{4}$ corner of section 5 and leaves near the southwest corner of section 6 on the west boundary of the township.</p> <p>There is considerable homestead interest in this township pending the original survey of the subdivisions.</p> |
