## GENERAL DESCRIPTION

The land in T. 39 N., R. 33 E. is nearly level and rolling desert. The graded gravel road which enters the township between sections 25 and 30 on the west boundary and leaves the township between sections 4 and 33 on the north boundary, is basically the dividing line, with the portion of the township west of this road rolling land and the portion east of this road nearly level desert. The soil varies from light sandy clay on the nearly level desert to rocky sandy clay on the rolling land.

The township drains southeasterly from the rolling land into the nearly level desert, thence northeasterly. There are five windmills within the township located in sections 13, 20, 23 and 34.
