

CHAINS

General Description

This township is located in Quinn River Valley and is nearly level to gently rolling desert land. The area drains Southerly into Quinn River, which drains South-Westerly through the South-East portion of the Tp.

The soil is sandy clay and there is no timber. Principal users of the area are cattlemen and there is some farming along Quinn River.

Access into the Tp. is provided by State Highway 8A which bears North-Westerly through the Tp. and numerous other desert roads.

No mineral formations of consequence were noted during the survey.
