

Dependent Resurvey, Portion of the Subdivision, T. 19 N., R. 65 E.

Chains

39.03

The original $\frac{1}{4}$ sec. cor. of secs. 19 and 30, monumented with a limestone, 16x8x6 ins., mkd. $\frac{1}{4}$ on N. face, loosely set in an old mound of stone.

At the corner point

Set an iron post, 3 ft. long, 1 in. diam., 20 ins. in the ground to bedrock, with the original stone deposited at base, and in a mound of stone to top, with brass cap mkd.

$$\begin{array}{r} \frac{1}{4} \text{ S } 19 \\ \frac{1}{4} \text{ S } 30 \\ 1943 \end{array}$$

Deposit the old corner stone at base of the iron post.

from which

A pinon, 3 ins. diam., bears S. 66° W., 126 lks. dist., mkd. $\frac{1}{4}$ S30 BT.

A juniper, 5 ins. diam., bears N. $72\frac{1}{2}^{\circ}$ W., 187 lks. dist., mkd. $\frac{1}{4}$ S19 BT.

S. 88° 16' W., beginning new measurement.

Asc. 70 ft. over broken general SE. slope.

12.50 Spur, slopes S.; desc. 100 ft. over broken SW. slope.

24.50 Ravine, course S.

26.50 Spur, slopes S.

27.50 Ravine, course S.; asc. 200 ft. over broken rocky SE. slope.

39.00 The cor. of secs. 19, 24, 25 and 30, on the W. bdy. of the township.

Land, rolling mountainous and broken mountainous.

Soil, gravelly and rocky.

Timber, juniper and pinon; undergrowth, sagebrush.

General Description

The southwest corner of this township is situated about five miles northeast of McGill, Nevada. The Duck Creek Valley extends in the southwest portion of the township, but the township generally lies along the broken western slopes of the Shell Creek Range, and the present survey largely delineates the dividing line between lands administered by the Bureau of Land Management and the Forest Service. Sections 19, 29 to 32 inclusive, the west half of section 28 and the west half of section 33 lie outside the Forest Reserve, while the remainder of the township lies within the Reserve and is mostly unsurveyed; the north three miles of the west boundary lies along the west boundary of the Forest Reserve.

The land is mainly broken mountainous, with drainage to the west and southwest. The soil is generally shallow sand and gravel and frequently rocky, with some clay loam in the valleys.
