71.70 Shallow wash, course N. 75° E.

80.00 The cor. of secs. 5, 6, 7 and 8.

Land, rolling.

Soil, gravelly clay; 3rd rate.

Timber, none.

Undergrowth, shadscale, white sage and yellowtop.

Grazing, fair.

General Description

T. 9 N., R. 70 E. is located near the NE. cor. of Lincoln County, Nevada, approximately 35 miles S. of Baker, Nevada, in an area known as Hamlin Valley. Hamlin Wash runs through the township in a northerly direction, carrying a considerable flow of water at times of flood and during the spring runoff but usually dry at other times. The "bench" land to the E. and W. of the wash is generally a gravelly clay soil, supporting a good growth of desert plants, white sage predominating, and furnish extensive winter range for cattle and sheep. There is a strip of land along Hamlin Wash, about a half mile to a mile wide, with very deep clay loam soil of a fairly good quality.

There are no settlers within the township and no improvements. No improved roads cross the township and there is practically no timber.
