

## Survey of a Portion of the Subdivision of T. 18 N., R. 60 E.

## Chains

- 24.15 Center of paved highway, U. S. No. 50, on curve, bears N. 47° E. and S. 52° W.
- 26.15 Wash, 30 lks. wide, 3 ft. deep, in main ravine, course S. 40° W.; asc. 120 ft. over rocky S. slope.
- 26.35 Telephone line, bears N. 50° E. and S. 40° W.
- 40.00 Point for the  $\frac{1}{4}$  sec. cor. of secs. 14 and 15.

Set an iron post, 3 ft. long, 1 in. diam., 18 ins. in the ground to bedrock, and in a mound of stone to top, with brass cap mkd.

$$\begin{array}{c} \frac{1}{4} \\ \text{S } 15 \quad | \quad \text{S } 14 \\ 1945 \end{array}$$

from which

A juniper, 6 ins. diam., bears S. 34 $\frac{1}{4}$ ° E., 33 lks. dist., mkd.  $\frac{1}{4}$  S14 BT.

A juniper, 8 ins. diam., bears S. 55 $\frac{1}{4}$ ° W., 73 lks. dist., mkd.  $\frac{1}{4}$  S15 BT.

Note: Discontinued survey of the subdivision of the township at this  $\frac{1}{4}$  sec. cor.

Land, mountainous.

Soil, sandy, gravel and rocky.

Timber, juniper and pinon; undergrowth, sagebrush, buckbrush and grass.

## General Description

This township lies in the heart of Jake's Valley and is situated along the lower western slopes of the desert mountains known as Egan Range, and is about 20 to 25 miles northwest of Ely, Nevada. U. S. Highway No. 50 crosses the township in a northeast and southwest direction from section 13 on the east boundary to section 31 on the west boundary.

The soil on the valley portions of the township is composed of a light colored fine textured alkaline clay. The soil over the rolling hilly portions is generally largely composed of sand, gravel and rock. Elevations vary from about 6200 to 6800 ft. above sea level.

Most of the area is devoid of timber, except on the hilly portions where there is generally some cedar and pinon. Undergrowth consists mostly of low sage, shadscale, salt weeds and grasses, with some blackbrush and greasewood.

The area is chiefly valuable for stock grazing purposes.
