

## DEPENDENT RESURVEY OF PORTION OF SUBDIVISION OF T. 18 N., R. 21 E.

Chains

## GENERAL DESCRIPTION

The resurveyed sections of this township lie on hilly to mountainous land no portions of which are suitable for cultivation. Its only agricultural use is for grazing purposes.

The slopes are covered with pinon pine and juniper timber and an undergrowth consisting principally of sagebrush and buckbrush. A fairly good stand of grasses and annual plants is found on all the higher slopes.

Old wood roads make all portions accessible.

The nearest postoffice and supply point is Virginia City, Nevada about 6 miles distant in a southerly direction.
