NORTH, along line 5-1, Tract No. 43.

6.00 Wash, 10 lks. wide, 1 ft. deep, drains E.

20.00 Angle Point No. 1, Tract No. 43 and point of beginning.

---

GENERAL DESCRIPTION

The land within the township varies from nearly level hay meadows to high rolling hills. The soil is a clay loam mixed with gravel on the uplands and a sandy silt along the creeks.

Water is provided by Gance, Pie and McClellan Creeks which flow through the township in an easterly direction.

The vegetation is mostly sagebrush and bunchgrass on the uplands and wild meadow grasses along the creeks. The eastern portion of the township has been reseeded with crested wheat grass.

Principal uses of the township are cattle grazing and raising of native hay.

The Saval Ranch is located in secs. 5 and 8.

No mineral formations were noted during the course of the survey.
