reset the remains of the squared wooden post, alongside the iron post, and raise a mound of stone, 3 ft. base, 2 ft. high, W. of cor.

From this corner, a copperweld post, $\frac{1}{2}$ in. diam., firmly set in the ground, marked U-41-3, established in the control net for the protraction surveys under Grp. No. 389, bears N. $34^{\circ} 08' 17''$ W., 9.72 chs. dist. The geographic position of this tellurometer station is latitude $39^{\circ} 48' 52.219''$ N. and longitude $114^{\circ} 51' 56.539''$ W.

Land, nearly level.

Soil, sandy and gravelly clay loam.

Timber, none; undergrowth, sagebrush, rabbit brush and greasewood.

GENERAL DESCRIPTION

The land along these lines resurveyed is located in Steptoe Valley and is located at an elevation of approximately 5,900 to 6,100 feet above sea level.

Duck creek is located in Steptoe Valley and flows in a northerly direction through the eastern tier-of sections in the township. There is a medium heavy stand of undergrowth on the lines and there is a good stand of native grasses in the valley floor. The Nevada Northern Railroad traverses from the south to the north through the eastern portion of the area. There are several semi-improved roads which can be used for access through the area.

There are no irrigated fields in the area and the land is used for cattle and sheep.
