

DEPENDENT RESURVEY OF T. 40 N., R. 33 E.

	CHAINS	<p>The point for the N. <math>\frac{1}{4}</math> sec. cor. of sec. 6 is on the Eighth Standard Parallel North and at proportionate distance.</p> <p>Set an iron post, 28 ins. long, <math>2\frac{1}{2}</math> ins. diam., 24 ins. in the ground, with brass cap mkd.</p> <p style="text-align: center;">T41N R33E</p> <div style="text-align: center;"><div><div><math>\frac{1}{4}</math></div><div>S</div><div>6</div></div><div>T40N</div></div> <p style="text-align: center;">1965</p> <p>raise a mound of stone, 3 ft. base, 2 ft. high, S. of cor.</p> <p>From this cor., the standard <math>\frac{1}{4}</math> sec. cor. of sec. 31, T. 41 N., R. 33 E., bears N. <math>66^{\circ} 40'</math> E., 0.61 chs. dist.</p> <hr/> <p style="text-align: center;">GENERAL DESCRIPTION</p> <p>The land within Township 40 North, Range 33 East, is nearly level to rolling, the western portion is rolling. The elevation ranges from about 4100 to 5400 ft. above sea level. The soil varies from sandy loam and alkali on the lower elevations to sandy clay loam, gravelly and rocky on the higher elevations. The timber consists of scattered cottonwood trees along Bottle Creek. The vegetation consists of sagebrush, shadscale, budsage and greasewood. There are four settlers farming irrigated land in the east-central portion of the township. There numerous wells and pumps scattered throughout the cultivated area.</p> <p>Most of the township is drained by Bottle Creek, which crosses through the southern part of the township and is used for irrigation.</p> <p>There is a small amount of mineral activity in sections 7 and 8, which is mostly cinnabar mining.</p> <p>Principal users of the area are farmers, cattlemen and some mining. Access into the township is provided by a graded gravel road and other desert roads.</p> <hr/>
