Soil, sandy clay and loam. Undergrowth, sagebrush.</p>
	<p style="text-align: center;">GENERAL DESCRIPTION</p> <p>The land within Township 39 North, Range 41 East varies from mountainous in the extreme eastern and western portions to nearly level in the central portion known as Eden Valley. The elevation ranges from about 4600 to 6900 ft. above sea level. The soil is sandy clay, loam and rocky on the mountainous portions. The vegetation consists of sagebrush, shadscale, budsage and sparse native grasses.</p> <p>The township is drained by Eden Creek which crosses the township in a northerly direction. Scott Spring is located in Sec. 18. No mineral formations of consequence were noted during the survey.</p> <p>Principal users of the area are cattlemen and access into the township is provided by desert roads. There are no settlements within the township.</p>
