Land, rolling.
Soil, clay and gravel.
Timber, juniper and pinon.
Undergrowth, sagebrush.

GENERAL DESCRIPTION

Township 3 South, Range 71 East, is located about 15 miles ESE. of Panaca, Nevada. Access into the area is provided by Nevada State Highway No. 25 and desert roads. The Union Pacific Railroad enters the township near the E. $\frac{1}{4}$ sec. cor. of sec. 4 and leaves near the SW. cor. of sec. 7. The elevation is about 6000 ft. above sea level. The terrain varies from rolling to hilly.

The soil consists principally of a shallow heavy clay and gravel with rock outcroppings. There is a dense growth of juniper and pinon timber covering the township. There is a well located in sec. 31, the tie to which is given in the field notes of T. 3 S., R. 70 E., resurveyed concurrently under this group. No mineral formations were noted in the course of the resurvey. There are no residents in the township. Stockmen are the principle users of the area.
