raise a mound of stone, 3 ft. base, 2 ft. high, S. of cor.

From this corner, the closing cor. of Tps. 16 and 17 N., R. 27 E., bears WEST, 19.17 chs. dist.

GENERAL DESCRIPTION

Township 16 North, Range 27 East, M.D.M., is situated on the northern slope of the Desert Mountain Range and includes portions of the Dead Camel Mountains. The center of the township is about 18 miles southwest of Fallon, Nevada. Access is provided by numerous trail roads. The elevation varies from about 4,050 to 5,850 ft. above sea level. Terrain is rolling to mountainous. Soil consists principally of sandy clay with basalt stone. There is no timber in the township however grass is abundant. No significant mineral deposits were noted. Drainage is largely through Sam Spring Wash, exiting the area near the center of the East boundary. Stock water wells are located in sections 1, 17 and 24. There are several drift fences in the north and western portions of the area.

Currently principal users of the township are stockmen. There are no residents in the area.
