	Land, mountainous.
	Soil, sandy clay and gravel. Timber, pinon. Undergrowth, sagebrush and greasewood.
	ondergrowth, sagebrush and greasewood.
	GENERAL DESCRIPTION
	The land along the west boundaries of Townships 26, 27 and 28 North, Range 69 East, ranges from about 6500 to 7000 ft. above sea level, and is gently rolling to mountainous. The soil is sandy clay and gravel. The vegetation consists of sagebrush and greasewood. There is scattered pinon on the higher elevations.
	The area along the surveyed line is drained by numerous minor drainages.
	No mineral formations of consequence were noted during the survey.
:	Principal users of the area are cattlemen. Access into the area is provided by numerous desert and trail roads.
