Mile Post No. 56, on the Nevada-Utah State Line,
bears N. $0^{\circ} 17'$ E., 69.62 chs. dist.

U.S.C. & G.S. triangulation station "COR," monu-
mented with a concrete block, 12 ins. square,
3 ins. above ground, bears S. $86^{\circ} 29'$ W.,
0.132 chs. dist.

Land, level.

Soil, sandy clay.

Timber, none.

Undergrowth, sagebrush, greasewood and bunchgrass.

GENERAL DESCRIPTION

The land along the Sixth Standard Parallel North, ranges from about 4,500 to 6,500 ft. above sea level, and is nearly level to mountainous. The soil is sandy clay, gravelly and rocky. The vegetation consists of sagebrush, greasewood and bunchgrass. There is scattered juniper and pinon on the higher elevations.

No mineral formations of consequence were noted during the survey.

Principal users of the area are cattlemen. Access into the area is provided by Alternate U. S. Highway No. 50, and desert trail roads throughout the area.
