Thence N. 53° 21' W., along line 4-1 of Mineral
Survey No. 40.

3.04 Corner No. 1, the place of beginning.

GENERAL DESCRIPTION

The Northeasterly portion of the Township is
located on the Southerly end of the Eugene
Mountains. The Humboldt River, located in the
Southern portion, flows into Rye Patch Reser-
voir in the Southwest portion.

The soil consists of a sandy loam in the valleys
and loam with rock outcroppings in the mountains.

The vegetation consists of shadscale, budsage
and greasewood.

There are a few abandoned mines in the mountains
with some prospecting in the Northeast portion
of the Township.

The main access to the Township is from Imlay,
located about four miles Southeast of the
Southeast Township corner.
