1976

deposit the original cornerstone and set a steel fence  
post, 5½ ft. long, 22 ins. in the ground, alongside the  
iron post and raise a mound of stone, 3 ft. base, 2 ft.  
high, W. of cor.

Thence S. 52° 20' W.

9.087 Cor. No. 1, M.S. No. 4457, Blue Horse Lode, and place of  
beginning.

GENERAL DESCRIPTION

The land along the baseline varies from about 4,580 to  
8,000 ft. above sea level and varies from nearly level  
to mountainous. The soil varies from sand and alkali in  
the more level parts to gravel and rocks in the  
mountainous parts. The vegetation consists principally  
of sagebrush and greasewood in the more alkali areas,  
and native grasses in the mountains of Ranges 49 and 50  
East. Juniper and pinon are also found.

There is a mineral survey in sec. 35, of T. 1 N., R.  
49 E., and mining activity in the easterly portion of  
R. 42 E., and westerly portion of R. 43 E.; the easterly  
portion of R. 48 E., all of R. 49 E., and the westerly  
portion of R. 50 E.

The principal users of the area are people in the live-  
stock industry, the mining industry, and the research  
and testing industry. Access is provided by numerous  
trail roads and two paved roads: U.S. Highway No. 95  
in the eastern part of R. 42 E. and a state access road  
in the western part of R. 47 E.
