

DEPENDENT RESURVEY OF THE EAST BOUNDARY
T. 42 N., R. 52 E., MDM, NEVADA

CHAINS

GENERAL DESCRIPTION

The land resurveyed within Township 42 North, Range 52 East, is mountainous land located on the western slope of the Independence Mountains. The soil consists of a sandy clay loam to rocky in the higher elevations. The vegetation consists of sagebrush and native grasses.

The land resurveyed is drained by several creeks which all flow in a general westerly direction.

Principal use of the land is for grazing livestock. Access into the township is provided by improved and unimproved roads. No mineral formations of consequence were noted during the survey.
