1977

40.04 True point for the  $\frac{1}{4}$  sec. cor. of secs. 13 and 24, falls in a ravine, draining S., where corner cannot be perpetuated.

Asc. 110 ft. over ledgy E. slope.

54.30 Ridge, bears N. and S.; desc. 350 ft. over W. slope of ledges.

67.00 Vigo Canyon, drains S.; asc. 200 ft. over broken and ledgy E. slope.

80.08 The cor. of secs. 13, 14, 23 and 24.

Land, mountainous.

Soil, sandy clay and rocky.

Timber, joshua trees.

Undergrowth, greasewood, yucca and mesquite.

## GENERAL DESCRIPTION

The land surveyed within Township 10 South, Range 66 East, is mountainous. The elevation ranges from about 2400 to 3000 ft. above sea level. The soil varies from sandy clay to rocky. The vegetation consists of greasewood, yucca, mesquite and joshua trees.

The Union Pacific Railroad crosses the area from NE. to SW. The township is drained by the Meadow Valley Wash, which drains southwesterly through the township. Access into the township is provided by one trail road which winds along the railroad tracks.

No mineral formations of consequence were noted during the survey.
