

## TOWNSHIP 10 NORTH, RANGE 39 EAST, MDM, NEVADA

## CHAINS

The following field notes are those of the dependent resurvey of the Second Standard Parallel North, through a portion of Range 39 East and the survey of a portion of the subdivisional lines of Township 10 North, Range 39 East, Mount Diablo Meridian, Nevada.

The Second Standard Parallel North, and the west boundary were surveyed by Glover and Parrin, U.S. Deputy Surveyors, in 1881, under Contract No. 104.

Lines connecting the corner positions were run by random and true method. In order to simplify the record, the true line notes only are supplied herewith which refer to the completed survey.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated July 27, 1977.

The directions of the lines of this survey were determined by azimuth taken from U.S.G.S. triangulation station "BM Z-25" and carried forward by sustained angulation throughout the progress of the survey.

The geographic position for the southeast corner of section 33, is at latitude  $38^{\circ} 40' 47.6''$  N. and longitude  $117^{\circ} 35' 20.5''$  W., as calculated along section lines from the cor. of Tps. 9 and 10 N., Rs. 38 and 39 E., which is a tellurometer traverse station, occupied under Group No. 389, Nevada.

The magnetic declination was found to be  $17^{\circ}$  E.

DEPENDENT RESURVEY OF THE SECOND STANDARD PARALLEL NORTH,  
THROUGH A PORTION OF RANGE 39 EAST,  
MOUNT DIABLO MERIDIAN, NEVADA

Reestablishment of the Survey Executed by  
Glover and Parrin, U.S. Deputy Surveyors,  
in 1881.

The original standard cor. of secs. 32 and 33, monumented with a squared wooden post, 24 ins. long, 2 ins. square, loosely set in a mound of earth, with illegible scribe marks visible.

At the corner point

Set an iron post, 28 ins. long,  $2\frac{1}{2}$  ins. diam., 24 ins. in the ground, with brass cap mkd.
