	1978								
	set a steel fence post, 5 ft. long, 6 ins. in the ground alongside the iron post.								
	Land, mountainous. Soil, sandy clay and rocky. Undergrowth, sagebrush, greasewood and native grasses.								
	GENERAL DESCRIPTION								
	The lines surveyed within Township 7 South, Range 55 East, varies from rolling to mountainous land. The elevation ranges from about 4600 to 6000 ft. above sea level. The soil is sandy clay and rocky. The vegetation consists of sagebrush, greasewood and native grasses.								
	No mineral formations of consequence were noted during the survey.								
	Access into the township is provided by improved and unimproved desert trail roads throughout the township.
