T. 36 N., R. 26 E., MDM, NEVADA

CHAINS  
20.30

Angle Point No. 1, Tract No. 38, and point of beginning.

GENERAL DESCRIPTION

The area resurveyed within Township 36 North, Range 26 East is situated on an arm of the Black Rock Desert. The elevation varies from about 3,900 to 4,400 ft. above sea level. The soil varies from sandy clay loam in the western part to sandy and rocky in the eastern part. The Black Rock Mountain Range is located in the eastern part of the resurveyed area. The vegetation consists of shadscale, greasewood, sagebrush and native grasses.

Double Hot springs and another hot spring are located in the NW  $\frac{1}{4}$  of section 4. Access is provided by driving across Black Rock Desert (when it is dry) or by a trail road entering the township from the north in the NW corner of section 4. There are mining claims located in the foothills of the Black Rock Range.

The principal uses of this area are searching for rocks, Indian artifacts and geothermal energy.
