

## TOWNSHIP 41 NORTH, RANGE 48 EAST, MDM, NEVADA

CHAINS

## GENERAL DESCRIPTION

The land within Township 41 North, Range 48 East, ranges from about 5,600 to 7,400 ft. above sea level, and is gently rolling to mountainous. The soil varies from sandy clay and gravelly in the lower land to rocky in the higher elevations. The vegetation consists of sagebrush and native grass. The area is drained by numerous creeks and dry washes, draining northerly through the township.

Principal users of the area are cattlemen. Access into the township is provided by improved and unimproved desert roads.

No mineral formations of consequence were noted during the survey.
