GENERAL DESCRIPTION

The area resurveyed within Township 34 North, Range 55 East, varies from nearly level to gently rolling. The elevation ranges from about 5,030 to 5,300 ft. above sea level. The soil varies from sandy clay loam and rocky on the higher elevations to black loam on the bottom land. The vegetation consists of greasewood, sagebrush and native grass. There are scattered stands of juniper on the higher elevations with a heavy stand of willows along the Humboldt River.

The Humboldt River crosses the NW. corner of sec. 29 flowing southwesterly.

The Western Pacific Railroad crosses the area from NE. to SW. Further access into the area is provided by Bullion Road and numerous trail roads.

Principals users of the area are cattlemen. No mineral formations of consequence were noted during the survey.
