

## TOWNSHIP 39 NORTH, RANGE 19 EAST, MDM, NEVADA

CHAINS

## GENERAL DESCRIPTION

The land within Township 39 North, Range 19 East, ranges from about 6,200 to 7,400 ft. above sea level, and is mountainous. The soil varies from sandy clay to gravelly and rocky. The vegetation consists of sagebrush, buckbrush and bunchgrass. There are scattered juniper, aspen and mountain mahogany on the higher elevations of little commercial value.

The township is drained by Mountain View Creek, which flows southeasterly through the township.

Principal users of the area are cattlemen and access into the township is provided by improved gravel and trail roads.

No mineral formations of consequence were noted during the survey.
