

TOWNSHIP 43 NORTH, RANGE 19 EAST, MDM, NEVADA

CHAINS

GENERAL DESCRIPTION

The land within Township 43 North, Range 19 East, located in Long Valley, ranges from approximately 5,500 to 7,000 ft. above sea level, encompassing the southern end of Alkali Lake, rising to a north-south mountain range along the western tier of sections. The soil is sandy clay loam mixed with varies amount of alkali at the lower elevations, becoming rocky in the mountains. The vegetation consists of scattered sagebrush, rabbitbrush and native grass, with pockets of juniper, aspen and mountain mahogany at the upper elevations.

Access is gained to this area via Nevada State Highway No. 34 (graded gravel road) which enters in section 33 and leaves in section 1. Another major access road enters in section 32, joins with Nevada State Highway No. 34, and continues northerly along the fourth meridional line. There are a couple of other trail roads in the area. Improvements in the area are limited to a few ranch houses and several old buildings. There is also a major high voltage transmission line that traverses the eastern part of the township.

Principal users are ranchers and hunters.
