GENERAL DESCRIPTION

The land within Township 45 North, Range 19 East, ranges from about 5,600 to 6,700 ft. above sea level, and varies from rolling to mountainous. The soil varies from sandy clay to gravelly and rocky. The vegetation consists of sagebrush, buckbrush, rabbitbrush, greasewood, serviceberry and native grass.

There are scattered to heavy juniper, mountain mahogany and aspen throughout the area.

The area drains into Mosquito Lake, which is situated in the north central portion of the township. A high voltage transmission line crosses northwesterly through the township entering on the south boundary of section 34 and leaving on the north boundary of sec. 6.

Principal users of the area are cattlemen and access into the township is provided by improved and unimproved roads.

No mineral formations of consequence were noted during the survey.
