GENERAL DESCRIPTION	
<p>The area resurveyed within Township 33 North, Range 55 East, varies from rolling land to mountainous land. The elevation ranges from about 5,200 to 5,800 ft. above sea level. The soil is sandy clay loam and rocky. Vegetation consists of sagebrush, shadscale and native grass. There are stands of juniper throughout the township.</p> <p>The South Fork Humboldt River crosses into sections 18, 19, 30 and 31, draining irregularly N., in the vicinity of the west boundary of the township.</p> <p>Principal users of the area are cattlemen. Access into the township is provided by improved and unimproved roads. No mineral formations of consequence were noted during the survey.</p>
