TOWNSHIP 11 NORTH, RANGE 69 EAST, MDM, NEVADA

CHAINS

The following field notes are those of the dependent resurvey of a portion of Mineral Survey No. 4432 A and the survey of a portion of the west boundary and a portion of the subdivisional lines of Township 11 North, Range 69 East, Mount Diablo Meridian, Nevada.

The east boundary was surveyed by Cadastral Engineer W. H. Good in 1921 under Group No. 71. Mineral Survey No. 4432 A and B were surveyed by U.S. Mineral Surveyor W. B. Colwell in 1919. The First Shot, First Shot No. 1, First Shot No. 2, First Shot No. 3 and Ivan lode claims of Mineral Survey No. 4432 A were cancelled on March 31, 1989. The east 3 miles of the north boundary was surveyed by Cadastral Surveyor S. R. Lambeth, in 1988 under Group No. 650.

Before restoring the corners, the lines of the original surveys were retraced and diligent search made for any evidence of the original corners and other calls of the original field note record.

In order to simplify the record, the true line notes only are supplied herewith, which refer to the completed survey.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated July 12, 1988.

The directions of the lines of this survey were determined by azimuth taken from U.S.G.S. triangulation station "BUCK," located in sec. 27, T. 12 N., R. 70 E. and U.S.C. & G.S. triangulation station "CHOKE CHERRY," located in unsurveyed T. 11 N., R. 69 E. The directions of the lines were carried forward throughout the township by sustained angulation.

The vertical angles of measurements made on the slope were ascertained with a theodolite in good adjustment; the horizontal equivalents only are entered in the field notes.

The geographic position of the southeast corner of sec. 15 is at latitude $38^{\circ} 49' 06.6''$ N., and longitude $114^{\circ} 12' 20.9''$ W., (NAD 27), as calculated from U.S.C. & G.S. triangulation station "CHOKE CHERRY."

The mean magnetic declination was found to be $14\frac{1}{2}^{\circ}$ E.
