

SURVEY FOR THE MINERAL SEGREGATION OF THE JORDAN  
MILLSITES 1 THROUGH 10, SECTIONS 17 AND 18,  
T. 16 S., R. 64 E., MDM, NEVADA

<p>CHAINS</p> <p>5.00</p>	<p>N. 0° 03' W., on the E. bdy. of Jordan Millsite No. 5.</p> <p>The NE cor., Jordan Millsite No. 5 and place of beginning.</p> <hr/> <p style="text-align: center;">GENERAL DESCRIPTION</p> <p>The land surveyed and resurveyed within Township 16 South, Range 64 East, ranges in elevation from about 2,000 to 4,000 ft. above sea level. The terrain is mostly gently rolling land to mountainous along the north two-thirds of the west boundary. The soil is sandy with many rocks. The vegetation consists of cacti, yuccas, creosote brush, chaparral and native grass.</p> <p>The drainage of the township is predominately to the southeast. Interstate Highway No. 15 and Union Pacific Railroad, which parallel each other, cross the extreme southeast corner, and the trail road that runs in a generally north and south direction on the west side of the township is the Mint 400 High Desert Racing Association Course. There is a radio facility located in section 11 and an electric transmission line into it. There is a transmission corridor that enters the township in section 32, proceeds in a northeasterly direction and exits in section 12.</p> <hr/>
