	<div style="text-align: center;">GENERAL DESCRIPTION</div> <p>The area surveyed in T. 17 N., R. 28 E., is mostly flat to gently rolling sand dunes and hillocks. The average elevation is approximately 3,900 ft. above sea level. The soil varies from sandy to alkali. The vegetation consists of sagebrush, greasewood and native grass.</p> <p>This area can be accessed south approximately 5 miles via State Highway No. 95 from Fallon Nv. then west approximately 5 miles via Lone Tree Road.</p> <p>There is a canal that crosses through secs. 16 and 21. No mineral formations of consequence were noted during the survey.</p>
