

## T. 16 N., R. 18 E., MOUNT DIABLO MERIDIAN, NEVADA AND CALIFORNIA

Preliminary to the resurvey, the lines of the original surveys and resurveys were retraced and a diligent search was made for all corners and other calls of the records. Identified corners were remonumented in their original positions; lost corners were reestablished and monumented at proportionate positions based on the official record. The retracement and survey data were thoroughly verified and only the true line field notes are given herein.

The directions of lines are based on the true meridian as determined by direct solar observations and carried forward by sustained right angulation, being supplemented by other observations on the sun taken throughout the progress of the survey. All measurements were made on the slope with electronic distance measuring devices and reduced to their horizontal equivalent. All lines were verified by traverse closure. Only prominent topography and topography near the corners was noted.

Geographic positions of certain corners are given on Page ii of these field notes.

The mean magnetic declination is 16 1/2° E.

RETRACEMENT OF A PORTION OF THE CALIFORNIA-NEVADA  
STATE LINE, FROM MILEPOST 186 TO MILEPOST 191,  
T. 16 N., R. 18 E., MOUNT DIABLO MERIDIAN, NEVADA AND CALIFORNIA

---

Retracement and Remonumentation of a Portion of the Survey  
Executed by A.W. Von Schmidt, in 1872

---

Beginning at Milepost 186, monumented with a mound of stone, 7 x 4 ft. base, 1 1/2 ft. high, from which the original bearing trees

A juniper, 45 ins. diam., bears N. 67 1/4° E., 39.5 lks. dist., with healed blaze. (Record, cedar, N. 69°08' E., 37 lks.)

A juniper, 64 ins. diam., bears S. 41 1/2° E., 89 lks. dist., with scribe mark N visible on partially healed blaze. (Record, cedar, S. 44°50' E., 80 lks.)

At the corner point
