The terrain is very rocky and access is limited to a few trail roads. The soil is rocky clay. Timber is scattered and consists of pinon pine and juniper. Vegetation that is found in the area is predominately sagebrush, cacti, rabbitbrush, Brigham tea and native grasses.</p> <p>There is a small reservoir in Eldorado Canyon in the southwest end of section 31. The other uses of the area are for a water storage tank in the southwest quarter of section 30 and a power substation in the northwest quarter of section 30 which each have a chain link fence around them enclosing areas of approximately half an acre. There is a power line crossing both sections 30 and 31. No mineral formations of consequence were noted during the survey.</p> <hr/>
