

SURVEY OF A PORTION OF THE SUBDIVISIONAL LINES,
T. 27 N., R. 48 E., MOUNT DIABLO MERIDIAN, NEVADA

CHAINS	<p style="text-align: center;">T27N R48E 1/4 S27</p> <p style="text-align: center;">2012</p> <p>From this point, the 1/4 sec. cor. of sec. 28 only, bears N. 0°41'00" W., 2.449 chs. dist., hereinbefore described.</p> <hr/> <p style="text-align: center;">GENERAL DESCRIPTION</p> <p>The area of the project is steep mountainous land, covered with bunch grass, pinion pine, juniper and some scattered fir at the higher elevations. Access is limited to Fourmile Canyon and Mill Creek. There are some narrow trail roads used for drilling exploration. Elevation ranges from about 9150 ft. on Mt. Tenabo to about 4800 ft. in Crescent Valley. Mill Creek is a perennial stream draining to the northwest with several springs at higher elevation contributing to its flow. Access from the south half of the west side of the township into the higher elevations is hampered by a cliff along the west face of Mt. Tenabo.</p> <p>Extensive prospecting and mining activities in the Mill Creek area is evident. Cattle grazing is also evident.</p> <hr/>
